EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Raymond Mah on June 25, 2003.

The application has been amended as follows:

A) Cancel claims 8-13.

2. The following is an examiner's statement of reasons for allowance: The prior art discloses a plane commutator having a plurality of segments providing a flat commutator surface, a plurality of metal base plates, a resinous boss member for holding the commutator segments and the metal base plate and each of the commutator segments having a commutator surface portion for forming a portion of the flat commutator surface at one end and a base portion and a projection projecting from the center of the base portion. However, the prior art fails to show, in combination with the invention, that each of the metal base plates has an engagement hole to which the projection is fitted and a terminal portion extending

along an outer periphery of a boss member and the base portion has a groove for holding powder that comes off from the projection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
